SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Python

Technologies: React, Next.js, Redux, Tailwind CSS, RTK Query, GraphQL, Node.js, Express

Tools: Git, Vite, Webpack, Jest, React Testing Library, Figma, NX Monorepo

Others: Figma, WebSockets, Docker, Kubernetes, AWS, CI/CD, MySQL, MongoDB

EXPERIENCE

Senior Frontend Engineer, [EPAM Systems](#) Dec 2024 – Present

- Contributed to the development of modern web applications using React, Next.js, TypeScript, and AWS within a Scrum team, focusing on performance, maintainability, and scalable architecture.
- Driving best practices by conducting code reviews and mentoring team members in technical decision-making.

Senior Frontend Engineer, (SaaS), [Nowadays](#) Mar 2023 – Present

- Built a productivity web application from scratch using the MERN stack (MongoDB, Express, React, Node.js) and Tailwind CSS, delivering a high-performing SaaS platform that automated repetitive tasks.
- Architected a modular, scalable codebase with NX Monorepo and developed a reusable React UI library for sharing across multiple applications, improving maintainability and accelerating development.
- Applied UI/UX best practices, mobile responsiveness, accessibility (WCAG), and cross-browser compatibility.
- Optimized performance through code splitting, lazy loading, and cache-first strategies to reduce load times.

Frontend Engineer, [GUI Bilisim](#) Apr 2020 – Mar 2023

- Developed React-based performant single-page applications, built on a shared codebase for managing and real-time monitoring of secure communication systems.
- Migrated legacy codebase from JavaScript to TypeScript, improving code maintainability and type safety.
- Built a React UI library, resulting in a 30% reduction in development time and increased team productivity.
- Managed project workflows across multiple projects using Kanban, collaborating with cross-functional teams to develop features and resolve bugs while mentoring junior developers.

Frontend Engineer, [Eti Maden](#) June 2018 – Apr 2020

- Developed an email alert system with React and Python to notify staff of network device failures and outages.
- Built an intranet portal using JavaScript and Flask, improving document accessibility for employees.
- Automated network device management with Python scripts, reducing configuration time for over 100 devices.

System and Network Administrator, [Eti Maden](#) Jan 2013 – June 2018

- Managed and maintained network infrastructure, including DNS and DHCP services, achieving 99% uptime.
- Administered Zimbra by configuring servers and implementing security policies to ensure email safety.
- Deployed and configured virtual servers with VMware, optimizing resource utilization for improved efficiency.

EDUCATION

Ankara University

Bachelor's Degree in Computer Engineering

June 2018

Ankara, Turkey

Ankara University

Associate's Degree in Computer Programming

June 2012

Ankara, Turkey
